[DOB]

Dear _____

I am writing to let you know that your recent cervical screening result showed no changes to the cells in your cervix at this time.

Because you will be 65 or over when your next test would be due, you will no longer be invited for cervical screening. Screening stops at this age because evidence shows that women over 65, with no recent changes to the cells in the cervix are highly unlikely to develop cervical cancer.

Cervical screening will pick up most changes to your cervix but can't find them all. If you have any unusual symptoms like discharge or irregular bleeding, please consult your GP or **XXX XXX**. You can also access further information about the Cervical Screening Programme at www.cancerscreening.hscni.net/cervical.

Yours sincerely

Dr XXXXXX XXXXXXXXXXXXX

C-3/64 Result letter for negative test (no HPV test); action: routine recall or cease
Letter for women who will be ceased from recall due to age as a result of this test
